SUMMARY

Computer Science & Engineering undergraduate specializing in Cyber Security & Digital Forensics with hands-on experience in data analysis, SQL, Excel, Tableau, dashboarding, reporting, databases, REST APIs, and application workflows. Experienced in analyzing datasets, identifying business trends, creating visual reports, and developing database-backed systems. Interested in CRM implementation, RevOps, workflow automation, and business systems.

EDUCATION

Vellore Institute of Technology (VIT)

2023 – 2027

B.Tech, Computer Science & Engineering – Cyber Security & Digital Forensics

CGPA: 8.04/10.0

Relevant Coursework: Data Structures & Algorithms, SDLC, Database Management (SQL), Operating Systems, Network Security, Cryptography, Machine Learning

TECHNICAL SKILLS

Data & Analytics: Excel, SQL, Tableau, Data Analysis, Data Visualization, Reporting, Dashboarding

Programming: Java, Python, C++, JavaScript

Backend & Databases: PostgreSQL, Node.js, Express.js, Flask, REST APIs

Tools: Git, GitHub, VS Code, Linux CLI, Google Colab, Jupyter

Cybersecurity: Network Security, Wireshark, Nmap, Burp Suite, Nessus, Socket Programming

PROFESSIONAL EXPERIENCE

Data Analyst Intern – MyLearningStep

May 2026 – Aug 2026

Remote

- Analyzed public government examination data to identify patterns across states, regions, gender, and age groups.
- Researched examination popularity and student preferences to identify meaningful trends and patterns in available datasets.
- Created Tableau visualizations and reports to communicate findings clearly and support management-level understanding of the analysis.

PROJECTS

E-Commerce Sales & Customer Analytics

GitHub

Excel, SQL, Data Analytics, Dashboarding

- Analyzed e-commerce sales and customer data to identify sales trends, customer patterns, product performance, and key business metrics.
- Structured and analyzed business data using Excel and SQL to transform raw data into meaningful insights.
- Developed an interactive dashboard presenting KPIs, sales trends, customer patterns, and category-level performance.

Ticket Booking System

GitHub

React, JavaScript, Node.js, Express.js, PostgreSQL, REST API

- Built and deployed a full-stack movie ticket booking application with registration, authentication, movie listings, show schedules, seat selection, and booking workflows.
- Implemented REST APIs and PostgreSQL-backed data management, including prevention of booking already-reserved seats.

Network Port Scanner & Vulnerability Mapper

2026

Python, Socket, Threading, Nmap, Tkinter

- Built a multi-threaded TCP/UDP scanner covering all 65,535 ports in under 45 seconds.
- Integrated the NVD API to map open ports to known CVEs and developed CSV/PDF export functionality.

CERTIFICATIONS

AMD Slingshot Campus Days Ideathon – Agentic Workflows & Collaborative Engineering, AMD India (2026)

NPTEL – Blockchain and Its Technology (2024)

Google – Foundations of Cybersecurity & Technical Support Fundamentals (2023) **Google/Coursera** – Bits and Bytes of Computer Networking (2023)

Skills India Digital Hub – Software Test Engineer (2024) **Virtual Cyber Lab** – Cyber Detection (2024)
